SUBJECT INDEX TO VOLUME 32, 1986

[A]

aerobic coccobacilli from seawater 1
aerobic, non-motile coccobacilli from seawater 1
Aeromonas hydrophila subsp. *anaerogenes* A52 25
3-amino-1,2,4-triazole (amitrol) 51
α-amylase gene 67
anaeriobic digestion 111
ascoideaceous yeasts 271

[B]

Bacillus subtilis 67, 73, 303
Bacillus phage 39
bacteria related to *Acinetobacter-Moraxella* from seawater 1
bacterial flora- in *Miang* 57
bacteriophage M2 343
ballistosporous yeasts from plants 225
biofertilizer 81
biological demethylation of polychlorinated phenoxy phenols 505
biomethylation of polychlorinated phenoxy phenols 505
Bullera derxii sp. nov. 125
Bullera intermedia sp. nov. 149
Bullera megalospora sp. nov. 225
Bullera pseudoalba sp. nov. 125
Bullera punicea comb. nov. 225

[C]

calorimetry 361
cap proteins 283
Chaetomium thermophile, polyphenol oxidase of 293
chitinase 25
chitobiase 25
chloramphenicol resistance 73
cholesterol- degrading bacteria 137
cholesterol oxidase-*rhodococcus* strains ..137
cloning vector 13
coenzyme Q systems 271
conidiation 535
constitutive mutant of lactose promoter ..405
controlling lipid accumulation 417
Coprinus cinereus 283, 541
Co-Q, of *Myxozyma* 259
Co-Q, of *Sterigmatomyces fuzhouensis* 367
Co-Q, of *Nematospora sinecauda* 447
cruciform structure of DNA 13
cruciform structure of plasmid DNA carrying palindrome 393
curcumin 263
current velocity 203
cyanobacterium 51
Cystofilobasidium 89, 215
cytosol 535

[D]

derivative of plasmid λdv 405
developmental mutant 541
diazotrophy 81
diquat 193
dissolved oxygen 203
distribution of plasmid DNA detected in PGA producing *Bacillus* strains 241
DNA base composition 215
DNA replication 343
DNA-terminal protein 39

[E]

E. coli recB recC sbcB recF 13, 393
enzymatic patterns 89
enzyme pattern, of *Sterigmatomyces fuzhouensis* 367
Escherichia coli 263, 527
esterase patterns of *A. luteoviolacea* 443
ethanol-*Saccharomyces cerevisiae* 499

[F]

fatty acid composition 473, 483
fatty acids 451
Fe^{2+} uptake and cell growth 101
Fellomyces polyborus, enzyme patterns of .157
fermentation-ethanol 499
food preservation 361
formic hydrogenlyase 263
fruit body formation 541

[G]

gas formation 263
genus *Fellomyces*, enzyme patterns of 157

genus *Sterigmatomyces*, enzyme patterns of 157
germination mutant 303
glycolysis-ammonium acceleration 499
Gloeocapsa sp.... 81
glucose metabolism altered by curcumin ..263
glutamine synthetase, of *Micrococcus glutamicus* 545
γ-Glutamylmethylamide-production by coupling of yeast cells and bacterial glutamine synthetase 545

[H]

habitat preference....203
herbicide 81
herbicide-utilizing yeast 193
high Fe content of clostrial peptidoglycan 101
high Fe content of clostrial wall 101
Holleya gen. nov. 447
Holleya sinecauda comb. nov. 447
Homology among DNAs encoding γ-GTP gene 241
Hop-22(29)-ene and Hopan-22-ol 317
hot spring 203
hydrogen sulfide, production of 491

[I]

immunoblotting 283
impurities of technical chlorophenols 505
induction of DNA replication by IPTG ..405
inulin fermentation 371
iron accumulation into clostridal wall 101
isoprenoid compound in bacteria 317
isozymes....535

[J]

Jerusalem Artichoke 371

[K]

Kluyveromyces fragilis 371

[L]

laccase (p-diphenol: O_2 oxidoreductase) (E.C.1.10.3.2².) 185
Lactobacillus plantarum, in *Miang*.... 57
lactose repressor 405
linear double-stranded DNA 39
Lipomyces starkeyi....193, 417

[M]

malate-dehydrogenase 535
membrane fluidity 473
metal content of clostridial wall 101
methanogenesis 111
methanol-, methane-, and methylamine-utilizing bacteria 317
Miang- fermented tea leaves in Thailand.. 57
microbial activity with water 361
Micrococcus glutamicus -glutamine synthetase of 545
mixed cultures....491
Myxozyma, Co-Q of 259
Myxozyma, Co-Q of genus 259
Myxozyma melibiosi, Co-Q of 259
Myxozyma mucilagina, Co-Q of 259

[N]

Nematospora sinecauda, Co-Q of 447
Neurospora crassa....535
new species of ballistosporous yeasts 125
nitrate respiration....527
nitrogenase (acetylene reducing) activity .. 51
non-motile coccobacilli from seawater ... 1
Nostoc muscorum 81
nucleotide sequence of *ori* region of pKY-1 433
nucleotide sequences of RNAI of pKY-1 433
nucleotide sequences of *cea** and *imm** ...433
numerical taxonomy 89

[O]

O_2 evolution 51
oligotrophic bacteria 451
outer membrane of *Acinetobacter* 177
outer membrane proteins of *Acinetobacter* 177
oxidation of fatty acids 111

[P]

palindromic DNA 13, 393
paraquat 193
peptide map 39
peptidoglycan-diaminopimelic acid type... 57
phosphatidylethanolamine 483
phospholipid composition....473
plasmid pKY-1 433
plasmids from *Bacillus* strains in "*Thua Nao*"....241

polyphenol oxidase, of *Chaetomium thermophile* 293
polysaccharides 519
promoter-probe vector 67
prophage transformation 67, 73
psychrophiles, pychrotrophs, and glucose mineralization 383
psychrophilic bacteria 473
psychrophilic bacteria 483
psychrotrophic strains of *Thiobacillus ferrooxidans* 169
Pyr(6,4)Pyo product....425
pyrimidine dimer 425

[Q]

quinones 451

[R]

radiation-resistant *Acinetobacter* 177
Rb. sphaeroides P47 as SCP 351
relative electrophoretic mobilities of enzymes 271
repricative intermediates of M2 DNA 343
restriction map 39
Rhodobacter sphaeroides P47 351
Rhodococcus chlorophenolicus 505
Rhodosporidium 89, 215
Rhodotorula....89, 215
rhisobium 519

[S]

Saccharomyces cerevisiae, high corn system 499
self-regulation by *lacP-lacI* 405
septal ultrastructure 271
sequence of lactose promoter 13
single cell protein 351
specific deletions in palindrome 393
spore....303
Sporobolomyces oryzicola sp. nov. 149
Sporothrix sect. *Farinosa* 549
Sporothrix sect. *Luteoalba*....549
Sporothrix sect. *Sporothrix* 549
Sterigmatomyces fuzhouensis, Co-Q and enzyme pattern of 367
Sterigmatomyces halophilus, enzyme patterns of 157
Sterigmatosporidium polymorphum, enzyme patterns of 157
sulfate-reduction 111
sulfur-oxidizing bacteria 203
superoxide dismutase 527

[T]

taxonomy of C_1-utilizing bacteria 317
temperate phage ϕ105 ....67, 73
theanine-production by coupling of yeast cells and bacterial glutamine synthetase 545
Trametes versicolor 185
transition from GC to AT 425

[U]

ubiquinone, of *Myxozyma* 259
ubiquinone, of *Nematospora sinecauda* ...447
ubiquinone, of *Sterigmatomyces fuzhouensis* 367
ubiquinone, squalene, sterols, and carotenoids 317
ubiquinone system of *Stephanoascuc farinosus* 165
ubiquinone systems in the genus *Sporothrix* 165
ubiquinones in ballistosporous yeasts 251
ubiquinones in *Bullera*....251
ubiquinones in *Sporidiobolus* 251
ubiquinones in *Sporobolomyces* 251
ultrastructure in *Sporothrix* 549
UV-mutagenesis 425

[V]

Vibrio ABE-1 ....473, 483

[Y]

Yarrowia lipolytica 271

[Z]

Zn^{2+}, Mn^{2+}, and monopotassium phosphate-lipid 417
